

JAMSHEDPUR WOMEN'S COLLEGE, JAMSHEDPUR
(A Constituent Autonomous College of Kolhan University, Chaibasa)

The BCA programme provides student with necessary skill to make successful career as a professional in competitive situation with satisfying jobs. It also prepares students with the requisite background to proceed with confidence for higher studies in the form of BCA and thus acquire greater competency. The BCA course structure is spread across six semesters in three years. Each semester comprises of seven papers with a balanced combination of theory and practical. This BCA course structure is designed as per Kolhan University, Chaibasa.

The Proposed Course Structure for Full Time 3 Years Bachelor of Computer Applications (BCA) programme is as follows: -

Eligibility Criteria

1. 10+2 Science with Mathematics or equivalent with minimum 45% marks

THE BCA COURSE STRUCTURE

| SEMESTER I | MARKS | | | PASSING % | CREDITS |
|--|-----------|------------|------------|------------|----------|
| | EXTERNAL | INTERNAL | TOTAL | | |
| THEORY | | | | | |
| BCA 101 Mathematics -1 | 70 | 30 | 100 | 45% | 4 |
| BCA 102 Computer Fundamentals & Office Automation | 50 | N/A | 50 | 45% | 2 |
| BCA 103 Programming in C | 50 | N/A | 50 | 45% | 2 |
| BCA 104 Digital Electronics & Computer Organization | 70 | 30 | 100 | 45% | 4 |
| BCA 105 Communication Skills/Technical English | 70 | 30 | 100 | 45% | 4 |
| SESSIONAL | | | | | |

| BCA 606 PROJECT | 50 | N/A | 50 | 45% | 2 |
| | Total Marks | | 3000 | Total Credit | 120 |

List of Electives

Semester 3 A) System Analysis and Design(100 Marks) /

B) Artificial Intelligence (100 Marks)

Semester 4 A) Computer Graphics & Multimedia (50 Marks) & Computer Graphics Lab (50 Marks)/

B) Linear Programming (50 Marks) & Linear Programming Lab using C/C++ (50 Marks)

Semester 5 A) Mobile Computing (100 Marks) /

B) Networks and Information Security (100 Marks)

Semester 6 A) Distributed System (100 Marks)/

B) Client-Server Computing (100 Marks)

Note: Students have to clear or Pass External or Internal Sessional Individually

SEMESTER I

THEORY

BCA 101 Mathematics-1

Full Marks-70

Time: - 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each ($10*2=20$ marks) from the entire syllabus uniformly.

Group -B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group -C: - This group consist of 4 questions, out of which 2 are to be answered, each carrying 15 marks ($2*15=30$)

Algebra: Sets, Union, intersection, complement, mapping, notion of group, ring, field with simple examples; Polynomials, division algorithm, fundamental theorem of classical algebra (without proof), Descartes rule of sign and their application, relation between roots and coefficients, symmetric function of roots, transformation of polynomial equations, Cardan's solution of cubic equation. Matrices, addition and multiplication of matrices, inverse matrix, solution of linear equations in three variables by Cramer's rule, solution of three line linear equations by matrix inversion method.

Differential calculus: Limits of function and continuity, fundamental properties of continuous functions (without proof), geometric meaning of derivative and differential, rules of differentiation, successive differentiation, Rolle's theorem, mean value theorem, Taylor's and Maclaurin's theorems with Cauchy's and Lagrange's forms of reminder, Taylor's series, function of several variables, partial derivatives, total differential, Euler's theorem on homogeneous functions of two variables.

Integral calculus: Rules of integration of indefinite integrals, solution of definite integrals and their elementary properties, idea of improper integrals.

Dimensional geometry: Transformation of rectangular axes, invariants, general equation of second degree – reduction to standard forms and classification, plane polar equation of a straight line, circle and conic.

Text Books:

1. Engineering Mathematics, Vol: 1 & Vol:2, Sastry, PHI
2. University Algebra through 600 Solved Problems, N. S. Gopalakrishnan, New Age International
3. Engineering Mathematics, Arumugam, SCITECH

BCA 102 Computer Fundamentals & Office Automation

Full Marks-50

Time: - 2 hrs 30 min

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 1 mark each ($10*1=10$ marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group –C: - This group consist of 4 questions, out of which 2 are to be answered, each carrying 10 marks ($2*10=20$)

Computer Basic: Algorithms, A simple model of a Computer, Characteristic of Computer , Problem Solving Using Computer. Computer Generation and Classification, Application, Element

Data representation : Representation of characters in Computer, Representation of Integers, Representation of Fractions, Hexadecimal Representation of Numbers, Error Detecting Codes) , Floating point Representation.

Number System and Conversion: Binary, octal, decimal & hexadecimal number system and their inter conversion.

Input/output Units: Description of computer input units, other input methods, computer output units, Logic Circuits

Computer Memory: Memory cell, Memory organization, Read-only Memory, Serial Access Memory, Physical Devices used to construct Memory, Magnetic Hard Disk, Floppy Disk device, Compact Disk Read-Only Memory (DCROM), magnetic tape Devices

Processor : Structure of Instructions, Description of a Processor.

Text Books:

1. V. Rajaraman
2. B. Ram

BCA 103 Programming in C

Full Marks-50

Time: - 2 hrs 30 min

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 1 mark each ($10*1=10$ marks) from the entire syllabus uniformly.

Group -B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group -C: - This group consist of 4 questions, out of which 2 are to be answered, each carrying 10 marks ($2*10=20$)

Introduction: Algorithms, Flow charts, Problem solving methods, Need for computer languages, Character set , Keywords, Identifiers, Constants, Variables, Storage class, Data types, Operators & expressions, Header files, Library files, Pre processor directives.

Transfer of control: Selection & iteration, Conditional and unconditional statements, Looping statements.

Functions: User defined and library functions, Recursion Vs Iteration, Passing parameters to the function

Arrays: Defining and processing an array, Passing array to a function, Multi dimensional arrays, String handling, Operations on strings.

Pointers: Declarations, Passing pointer to a function, Operations on pointers, Pointers and arrays, Arrays of pointers.

Structures and unions: Defining and processing a structure, passing structure to a function, Pointers and structures, Unions.

File Handling: Open, Close, Create, File operations, unformatted data files, Command line arguments.

Text Books:

1. Programming with C by Byron S. Gottfried, TMH Publishing Co. Ltd.
2. Programming with C by E. Balagurusamy, TMH Publishing Co. Ltd.

BCA 104 Digital Electronics & Computer Organization

Full Marks-70

Time:- 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each ($10*2=20$ marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group –C:- This group consist of 4 questions , out of which 2 are to be answered, each carrying 15 marks ($2*15=30$)

Number System: Binary Codes: BCD, Excess 3, parity, gray, ASCII AND EBCDIC codes, their advantages and disadvantages . Data Representation: positive, negative, maximum and minimum number representation (related to 8 bit number) real number representation

Binary Arithmetic: Binary Addition, decimal subtraction using 9's and 10's compliment, binary subtraction using 1's and 2's compliment

Logic Family: Construction and working of TTL NAND and NOR gates. Construction and working of CMOS TTL NAND AND NOR GATES, Logic Gate, Truth Table

Boolean algebra: Laws and identities of Boolean algebra, Demorgan's theorem. Use of Boolean algebra for simplification of logic expression, Karnaugh map for 2,3,4 variable, simplification of SOP AND POS logic expression using k-map.

Sequential Circuit: Flip Flop, multiplexor, demultiplexer

Combinational Circuits:

Half adder, Full adder, parallel adder, half subs tractor, full subs tractor, decoder, encoder, parity detector, construction and working with timing diagram.

Books:

1. Fundamentals of Digital Circuits, Anand Kumar, PHI
2. Digital Electronics, Tokheim, TMH
3. Digital Electronics, S. Rangnekar, ISTE/EXCEL

BCA 105 Communication Skills/Technical English

Full Marks-70

Time:- 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each (10*2=20 marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks (4*5=20)

Group –C:- This group consist of 4 questions , out of which 2 are to be answered, each carrying 15 marks (2*15=30)

Introduction to Communication Meaning and Definition - Process, Functions, Objectives, Importance, Essentials of good communication, Communication barriers, Overcoming communication barriers, Spoken and conversation for Greetings, Requests, Invitation, Permission, Thanks etc. Basic Sentence patterns, Agreement between Subject and Verb, Basic rule of Composition, Paragraph Development, Vocabulary Development, Model Auxiliary, Active and Passive voice, Conjunction and prepositions

Writing Skills

Guidelines for effective writing, Writing style of application, Personal Resume, Business letter and Memo including Requests, Complains, asking quotation etc., Technical Report writing

Speaking and Discussion Skills

Components of Effective talk / presentation, Planning of content of a talk / presentation, Use of Visual aids

Effective speaking skills, Discussion skills

Books

1. Basic Managerial Skills for all - S. J. McGrath - PHI
2. Reading to learn - Sheila Smith & Thomas M. Methuen (London)
3. Communication conversation Practice _ Tata McGraw Hil

SESSIONAL

BCA 106 C Programming Labs

- Data types and variables, operators and expressions, evaluation of expressions
- Conditional operators, If-if else-if statement, nested if, iteration
- Repeat ion structure in C, modular programming, iteration function
- Recursion, Storage classes, arrays, structures, pointers, unions
- Searching, sorting, selection, linked list
- Searching sorting on strings, multidimensional arrays, operations on files
- Std. C library, Use of Std. C library.

BCA 107 Office Automation Labs

Introduction MS Windows (Windows '98 Second Edition)

Desktop, creation of folders and shortcuts, features of Windows explorer

Familiarization and using MS packages Microsoft Word Microsoft Excel

Microsoft PowerPoint (Version MS-Office'2000)

Books:

1. Introduction to Computers with MS-Office, Leon, TMH
2. Personal Computer Software, EXCEL BOOKS

SEMESTER II

THEORY

BCA 201 Mathematics –II

Full Marks-70

Time:- 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each ($10*2=20$ marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group –C:- This group consist of 4 questions , out of which 2 are to be answered, each carrying 15 marks ($2*15=30$)

Differential equations: order, degree, solution and formation of a differential equation, standard techniques of solving a linear differential equation with constant coefficients, Cauchy's and Lagrange's linear differential equations with variable coefficients.

Linear Algebra: Vector space, subspaces, bases and dimensions, co-ordinates, linear transformation, algebra of linear transformations, isomorphism, representation of transformation by matrices. Sequence and series: Bounded and unbounded sequences, convergence or divergence of a sequence, behaviour of monotone sequences

Algebra Of Convergent Sequences: Cauchy's sequence, Cauchy's general principle of convergence, infinite series – its convergence and sum, series with positive terms and standard tests of convergence (without proof), alternating series, Leibnitz test, absolute convergence, rearrangement of absolutely convergent series, test of convergence of Abel and Dirichlet (without proof).

Books:

1. Engineering Mathematics, Vol:1 & 2, Sastry, PHI
2. Engineering Mathematics, Arumugam, Scitech
3. Higher Engineering Mathematics, Vol.2, Rathore, EPH

BCA 202 Data Structures

Full Marks-50

Time: - 2 hrs 30 min

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 1 mark each ($10*1=10$ marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group –C: - This group consist of 4 questions, out of which 2 are to be answered, each carrying 10 marks ($2*10=20$)

Fundamentals: Definition of data structure and storage structure, Classification of data structure, Selection of a data structure.

Arrays (Vectors and matrices): Vectors (1-D arrays), Row-major and column-major storage structures, Addition of two matrices, Multiplication of two matrices, Character arrays vs Strings.

Stacks: Arrays implementation, Linked-list implementation, Postfix, Prefix and Infix notation, Evaluation of postfix/prefix expression, Applications of stacks.

Queues: Array Implementation, Linked-list Implementation, Applications of queues.

Linked Lists: Singly, Doubly and Circularly linked lists.

Trees: Definition & Properties of binary tree, Pre-order, in-order, and post-order traversal of binary tree, Binary search tree.

Sorting: Bubble, Selection, Insertion, and Quick & Merge Sort.

Searching: Sequential search & Binary Search.

Text Books

1. Data Structures and Program Design in C, 2/e by Kruse PHI Pvt. Ltd.
2. C & Data Structures by P. S. Deshpande & O. G. Kakde, Dreamtech Pub.

Reference Books

1. Data Structures using C by Tanenbaum, Langsam&Augenstein, PHI Pvt. Ltd.
2. Expert Data Structures with C by R. B. Patel, Khana Book Publishing Co. Pvt. Ltd.
3. Data Structures through C by G. S. Baluja, Dhanpat Rai Publication.

BCA 203 Database Management Systems

Full Marks-50

Time: - 2 hrs 30 min

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 1 mark each ($10*1=10$ marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group –C: - This group consist of 4 questions, out of which 2 are to be answered, each carrying 10 marks ($2*10=20$)

Basic concepts

Database & Database Users Characteristics of the Database Systems. Concepts & Architecture
Data Models, Schemas & Instances DBMS Architecture & Data Independence Data Modeling using the Entity-Relationship Approach

Relational Model, Languages & Systems

Relational Data Model & Relational Algebra, Relational Model Concepts, Relational Model Constraints, Relational Algebra, SQL-A Relational Database Language Date Definition in SQL, View & Queries in SQL, Specifying Constraints & Indexes in SQL Specifying Constraints & Indexes in SQL, A Relational Database Management Systems ORACLE/INGRES

Relational Data Base Design

Function Dependencies & Normalization for Relational Databases Functional Dependencies, Normal forms based on primary keys (1NF, 2NF, 3NF & BCNF) Lossless join & Dependency preserving decomposition

Concurrency Control & Recovery Techniques

Concurrency Control Techniques, Locking Techniques, Time stamp ordering, Granularity of Data items
Recovery Techniques, Recovery concepts Database backup and recovery from catastrophic failures

Text Book:

1. Database Management System by Korth

Reference Books

1. Desai, B., “An Introduction to Database Concepts”, Galgotia Publications, New Delhi.
2. Elmsari and Navathe, “Fundamentals of Database Systems”, Addison Wesley, New York.
3. Ullman, J.D., “Principles of Database Systems”, Galgotia Publications, New

BCA 204 Computer Architecture

Full Marks-70

Time:- 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each ($10*2=20$ marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group –C:- This group consist of 4 questions , out of which 2 are to be answered, each carrying 15 marks ($2*15=30$)

Introduction: Evolution of Computers, Stored program concept and Von-Neumann architecture, Information representation and codes, Building blocks of Computers. Register Transfer and micro operations: Concepts of bus, Data movement among registers, A language to represent conditional data transfer, Data movement from/to memory, Arithmetic and logical operations with register transfer, Timing in register transfer.

CPU Architecture: Instruction format, Addressing mode, Instruction execution, Fetch and execution cycles, Stacks and handling of interrupts and subroutines, Instruction pipelining: stages, hazards and methods to remove hazards.

Micro-programmed control unit: Basic organization of micro-programmed controller.

I/O Organization: Strobe based and handshake based communication, Vector and Priority interrupt, DMA based transfer.

Microprocessors: 8 bit microprocessor architecture, 8085 pin description

Programmer's model of 8085, addressing modes of 8085; Instruction set of 8085; Assembly language program for 8085

Memory interfacing: I/O interfacing, Peripheral ICs, I/O memory Interfacing Chips, Bus structure of microprocessor systems, bus arbitration, Interrupt handling and DMA operation. Basic idea about microprogramming

Books:

1. Structured Computer Organisation : A.S. Tanenbaum
2. Computer Organization, Hamacher, TMH
3. 8085 : Introduction to Microprocessors for Engineers & Scientists, Ghosh&Sridhar, PHI
4. Computer Organization & System Software, EXCEL BOOKS
5. System Architecture, Burd, VIKAS

BCA 205 Managerial Economics

Full Marks-70

Time: - 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each ($10*2=20$ marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group –C:- This group consist of 4 questions , out of which 2 are to be answered, each carrying 15 marks ($2*15=30$)

Nature and Scope of Economics: Nature of human wants, Concepts of wealth utility. Value and price, Microeconomics: Its principles, Limitation and importance, Difference between micro and macro economics.

Managerial Economics: Factors influencing managerial decisions, Managerial economics and order disciplines, Objectives of the firms, Managerial descisions Demand Analysis: Meaning and types of demand, Determinants of demand, Law of demand and exceptions to it, Law of diminishing marginal utility, Equi-marginal utility.

Elasticity of demand: determinants of Elasticity, Measurement of elasticity, Income elasticity and cross elasticity, Demand forecasting and its methods (in brief), Law of supply and exceptions to be the law of supply, Elasticity of supply.

Production & Cost Analysis: Production Function, Factors of production, Law of variable proportion, Returns to scale, Managerial uses of production function. Cost Concepts: Types of costs, shortrun cost curves and longrun cost curves, Determinants of costs.

Definition & Classification of Markets: Revenue concepts of pricing, Average, Marginal and total revenue, Determinants of price, Pricing under different objectives, Pricing under different market structures and equilibrium of firm (perfect and monopoly) price discrimination.

Books:

1. Joel Dean – Managerial Economics
2. Dwivedi – Managerial Economics (Vikas)
3. Varshney&Maheshwari – Managerial Economics (SCS)
4. V.L. Mote Paul & Gupta – Managerial Economics Concepts and Cases.
5. Gokhel& Others – Business Economics
6. Ahuja – Micro Economics - S. Chand
7. Jhingan – Micro Economics - Vrinda
8. Samuelson &Mordthans – Economics

SESSIONAL

BCA 206 Data Structures Lab

Data definition language Data manipulation language Constraints and sub queries Basic of PL/SQL

SEMESTER –III

THEORY

BCA 301 Probability and Statistics

Full Marks-70

Time:- 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each ($10*2=20$ marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group –C:- This group consist of 4 questions , out of which 2 are to be answered, each carrying 15 marks ($2*15=30$)

Classical frequency and axiomatic approach to probability. Marginal and conditional probability. Baye's theorem and independence.

Expectation & Random Variable: Definition of random variable, discrete and continuous. Probability mass function and probability density function. Mathematical expectation. Moment, moment generating function, characteristics function.

Probability Distributions: Discrete-uniform, binomial, Poisson, distributions. Continuous - Exponential, normal (univariate & multi variate)

Correlation and Regression

Text Books:

1. J.N. Kapoor & H.C. Sexena, Mathematical Statistics, S. Chand & Co.
2. J. E. Freund: Mathematical Statistics, Prentice Hall of India.
3. Saxena&Surendram, Statistical Inference, S. Chand & Co.
4. A.A. Afifi& S.P. Azen, Statistical Analysis, Academic Press.
5. Fundamental of Mathematical Statistics by Kapur and Gupta, S. Chand & Co.

BCA 302 Operating System

Full Marks-50

Time: - 2 hrs 30 min

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 1 mark each ($10*1=10$ marks) from the entire syllabus uniformly.

Group -B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group -C: - This group consist of 4 questions, out of which 2 are to be answered, each carrying 10 marks ($2*10=20$)

What is an operating system? Simple batch systems, multi-programmed batch systems, time sharing systems, Parallel systems, Distributed systems, real time systems.

Computer system structure: computer system operation. I/O structures storage structure, storage hierarchy and hardware protection.

Operating-system structure: system components, system services, system calls, system programs, and system structure---simple structure.

Process concept: CPU -I/O burst cycle, scheduling algorithms (Non-pre-Emptive—FCFS, SJF, Pre-emptive—SJF, RR)

Memory management :(contiguous allocation, paging, swapping, Segmentation). Virtual memory – Demand paging, page replacement, page replacement algorithms (FIFO, LRU) Thrashing.

File system structures: file allocation (contiguous, linked, and indexed), and free space management (bit vector, linked list, grouping, counting).

I/O Hardware : polling, interrupts, DMA, spooling, buffering.

Disk structure: disk scheduling (FCFS, SSTF, SCAN). Disk management- formatting boot block. Bad block, swap space management.

Security :The problem, authentication and program—threats, encryption.

Text Books:

1. Silverschwatz, “Operating System Concepts”, Willey

Reference Books

1. Dietel, “An introduction to operating system”, Addison Wesley
2. Tannenbaum, “Operating system design and implementation”, Phi

BCA 303 A - SYSTEM ANALYSES AND DESIGN

Full Marks-70

Time:- 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each ($10*2=20$ marks) from the entire syllabus uniformly.

Group -B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group -C: - This group consist of 4 questions , out of which 2 are to be answered, each carrying 15 marks ($2*15=30$)

Introduction

System definition and concepts: Characteristics and types of system, Manual and automated systems. Systems environment and boundaries, Real-time and distributed systems, Basic principles of successful systems

Systems Analyst

Role and need of systems analyst, Qualifications and responsibilities, Systems Analyst as **and** agent of change.

System Development cycle

Introduction to systems development life cycle (SDLC) : Various phases of development :Analysis, Design, Development, Implementation, Maintenance. Systems documentation considerations: Principles of systems documentation, Types of documentation and their importance, Enforcing documentation discipline in an organization.

System Planning : Data and fact gathering techniques: Interviews, Group communication, Presentations, Site visits. Selection plan and proposal Cost-Benefit and analysis: Tools and techniques

Systems Design and modelling

Process modelling, Logical and physical design, Design representation, Systems flowcharts and structured charts , Data flow diagrams , Common diagramming conventions and guidelines using DFD and ERD diagrams. Data Modelling and systems analysis , Designing the internals: Program and Process design ,Designing Distributed Systems . Modular and structured design Module specifications ,Module coupling and cohesion , Top-down and bottom-up design

Object Oriented Analysis and design

Introduction to Object Oriented Analysis and design life cycle, object modelling: Class Diagrams, Dynamic modelling: state diagram, Dynamic modelling: sequence diagramming.

BCA 303 B - Artificial Intelligence

Full Marks-70

Time: - 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each ($10*2=20$ marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group –C: - This group consist of 4 questions, out of which 2 are to be answered, each carrying 15 marks ($2*15=30$)

Scope of AI: Games, theorem Proving, Natural language Processing; Vision & speech processing, Robotics, Expert Systems; AI techniques-Search, Knowledge, Abstraction.

Problem Solving: State space search, Control Strategies (Depth first search, Breadth first search, Production systems). Problem Characteristics (Decomposable, ignorable, recoverable, predictable).

Use of Heuristics: Hill climbing; Best first search; A* algorithm

Game Playing: Minimax search; Alpha-Beta pruning.

Knowledge Representation: Predicate Logic (Well formed formulas, quantifiers, Prenex Normal Form, Skolemization, Unification, modus ponens, Resolution refutation-various strategies).

Natural Language Processing: Syntactic analysis, Top down and bottom up parsing, Augmented Transition Networks, Semantic analysis, case grammars,

Books

2. Russell &Norvig, Artificial Intelligence-A Modern Approach, LPE, Pearson Prentice Hall, 2nd edition, 2005.
3. Rich & Knight, Artificial Intelligence – Tata McGraw Hill, 2nd edition, 1991.

BCA 304 Object Oriented Programming Using C++

Full Marks-50

Time: - 2 hrs 30 min

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 1 mark each (10*1=10 marks) from the entire syllabus uniformly.

Group -B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks (4*5=20)

Group -C: - This group consist of 4 questions, out of which 2 are to be answered, each carrying 10 marks (2*10=20)

Object Oriented Paradigm: Basic Concept of Object Oriented Programming (OOP), Structure vs. OOP, Benefit of OOP

Introduction to C++ : Tokens, Keywords, Identifiers, Variables, Data Types, Operators in C++, Expressions and Implicit Conversions, Control Structures.

Functions in C++ : The Main Function, function Prototyping, Passing argument to a function, Inline Functions, Default Arguments, Function Overloading, Friend and Virtual Functions, Storage Classes.

Classes and objects: Class Declarations, Defining Member Functions, Nesting of Member Function, Private Member Functions, arrays within a Class, Creating objects, Arrays of Objects, Objects as Function Arguments, Pointers to Members, Difference between Structures and Classes.

Constructors and Destructors: Constructors, Constructors with arguments, Multiple Constructors, Constructors with Default Arguments, Dynamic Initialization of Objects, Copy Constructor, Destructors.

Operator Overloading: Defining Operator Overloading, Overloading of Unary and Binary Operators, Manipulation of Strings Using Operators, Type Conversions.

Inheritance: Introduction, Base and Derived Classes, Different forms of Inheritance, Virtual Base Classes, Abstract Classes, Constructors in Inheritance, Overriding Base Class Members.

Virtual Functions and Polymorphism: Introduction, Pointers to objects, this Pointer, Pointers to Derived Classes, Virtual Functions, Pure Virtual Functions, Friend Functions.

Files and Streams: Stream Classes, Opening and Closing of Files, File of Arrays, File of Structures, File Pointers and Their Manipulations, Error Handling During File Operations, Command-Line Arguments.

Text Books :

1. Balaguruswami, E., 'Object Oriented Programming in C++', Tata McGraw Hill Pub.

BCA 305 MANAGEMENT INFORMATION SYSTEMS

Full Marks-70

Time:- 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each ($10*2=20$ marks) from the entire syllabus uniformly.

Group -B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group -C:- This group consist of 4 questions , out of which 2 are to be answered, each carrying 15 marks ($2*15=30$)

Introduction: Definition and significance, Evolution, MIS Support for programmed and nonprogrammed decision making Model of decision making.

Structure of MIS: Based on management activity and organisational function, Conceptual and physical structure of MIS.

Information concept : Definition of information, information presentation Quality of information DSS (decision support system) : Characteristics of DSS, Decision support and structure of decision-making, Decision support repetitiveness of decisions, Classes of DSS, DSS users, GDSS, Characteristics of GDSS. Organisation and Information systems of information system, data and information Classification of information system, Definition of organisation.

Introduction to ERP: Evaluation of ERP, Integrated management, Supply-chain management and Resource management, Benefits of ERP.ERP implementation, Generalised model, Role vendors, Consultants and users. Future of ERP applications, Marketing of ERP.

SEMESTER –IV

THEORY

BCA 401 Data Communication & Computer Networks

Full Marks-70

Time:- 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each ($10*2=20$ marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group –C: - This group consist of 4 questions, out of which 2 are to be answered, each carrying 15 marks ($2*15=30$)

Introduction: History & development of computer network, network topologies, ISO reference model. Introduction to digital communication systems, Shannon Fano coding, Huffman's coding, Error control coding, Hamming distance, Linear block codes.

Physical layer: Transmission media, analog transmission, digital transmission, switching multiplexing, FDM, TDM.

MAC layer: Aloha Protocols, LAN-Ethernet, token ring, FDDI, and data link layer.

Network layer: Routing algorithms, Congestion Control algorithms, multicast and mobile routing.

Internetworking: Bridges, Switches, Repeaters and Routers.

Transport Layer: Connection Management, Flow control and buffering.

Application Layer: DNS, SNMP, MAIL, WWW, and FTP.

Text and Reference Books:

2. Andrew
3. Tanenbaum

BCA 402 Programming in JAVA

Full Marks-50

Time: - 2 hrs 30 min

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 1 mark each (10*1=10 marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks (4*5=20)

Group –C: - This group consist of 4 questions, out of which 2 are to be answered, each carrying 10 marks (2*10=20)

Introduction to Java: History of Java, Feature of Java, Types of Java programs. JDK Toolkits

Basic Java: Java keywords, data type in java, variable naming conventions, looping, construct, Arrays.

Java oops concept: Class, objects, Polymorphism, inheritance.

Packages: java packages, collection classes, creating a package.

Java Threads: Thread, single thread, multithread, Life cycle of a thread; the current thread, the thread class, synchronizations.

Applet: Applet class, life cycle of an Applet, Graphical class, Front class, passing parameters to applets.

Concept of AWT and SWING: Windows creation, event handling, menu, toolbar, form design etc.

Data base connectivity using JDBC

Text and Reference Books:

1. Java Programming by E. Balagurusamy, TMH Publishing Co. Ltd.
2. Java Programming , BLACK BOOK
3. Java 6, Sun Publication

BCA 403 Software Engineering Principles

Full Marks-70

Time:- 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each ($10*2=20$ marks) from the entire syllabus uniformly.

Group -B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group -C:- This group consist of 4 questions , out of which 2 are to be answered, each carrying 15 marks ($2*15=30$)

Introduction: Introduction to Software Engineering, Software Components, Software Characteristics, Software Crisis, Software Engineering Processes, Similarity and Differences from Conventional Engineering Processes, Software Quality Attributes. Software Development Life Cycle (SDLC) Models: Water Fall Model, Prototype Model, Spiral Model, Evolutionary Development Models, Iterative Enhancement Models.

Software Requirement Specifications (SRS): Requirement Engineering Process: Elicitation, Analysis, Documentation, Review and Management of User Needs, Feasibility Study, Information Modeling, Data Flow Diagrams, Entity Relationship Diagrams, Decision Tables, SRS Document, IEEE Standards for SRS. :-

Software Design: Basic Concept of Software Design, Architectural Design, Low Level Design: Modularization, Design Structure Charts, Pseudo Codes, Flow Charts, Coupling and Cohesion Measures, Design Strategies: Function Oriented Design, Object Oriented Design, Top-Down and Bottom-Up Design. Software Measurement and Metrics: Various Size Oriented Measures: Function Point (FP) Based Measures, Cyclomatic Complexity Measures: Control Flow Graphs.

Software Testing: Testing Objectives, Unit Testing, Integration Testing, Acceptance Testing, Regression Testing, Testing for Functionality and Testing for Performance, Top-Down and Bottom-Up Testing Strategies: Test Drivers and Test Stubs, Structural Testing (White Box Testing), Functional Testing (Black Box Testing), Test Data Suit Preparation, Alpha and Beta Testing of Products.

BCA 404 Environmental Science

Full Marks-70

Time: - 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each ($10*2=20$ marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group –C:- This group consist of 4 questions , out of which 2 are to be answered, each carrying 15 marks ($2*15=30$)

Environmental awareness: Definition, principles scope, and objectives of environmental science; concept on environment; World Environment Day and National Earth Day and their relevance; environmental awareness and education. Environmental movements in India (Narmada Dam, Tehri Dam)

Components of environment: Lithosphere, hydrosphere, atmosphere and biosphere; physical and biological environments;

Introduction to ecology: Definition, principles, and scope of ecology, ecosystem ecology; concepts of Gaia Hypothesis; limiting factors, combined concept on limiting factors

Principles and concepts of ecosystem: Concept of ecosystem; homeostasis of the ecosystem structure and functional aspects of ecosystem; ecological energetic; ecological interactions

Life Processes and characteristics: Basic ideas with respects to growth, metabolism and developmental processes

Biomes: Meaning of biomes, biome type, tropical evergreen rainforest biome, Monsoon deciduous forest biome, Savana biome, Mediterranean biome, Temperate grassland biome, Tundra biome, Marine biome

Man, society and environment: Human civilization processes (anthropological perspectives), society, class, gender; human settlements

Books

1. *Environmental Science* — S. C. Santra, New Central Book Agency.
2. *Environmental Science; Cunningham & Saigo WCB McGraw Hill*, 1999-5th Den.
3. *Environmental Science-Enger & Smith. 7th Den*, McGraw Hill .

Elective-II

BCA 405 -A Computer Graphics & Multimedia Application

Full Marks-50

Time: - 2 hrs 30 min

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 1 mark each ($10*1=10$ marks) from the entire syllabus uniformly.

Group -B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group -C: - This group consist of 4 questions, out of which 2 are to be answered, each carrying 10 marks ($2*10=20$)

Computer Graphics Applications: Interactive graphics, Graphics devices; Memory utilization or Data Storage, Point plotting technique.

Line drawing algorithms: Circle generator, Polygon and surface generation (Register, 2-Buffer), Hidden surface removal, Shading, Solid modelling, Two dimensional transformation.

Clipping and Windowing: 3D-graphics; 3D-transformation, Parallel projection, Perspective projection.

Concept of Multimedia: Multimedia and interactivity, Multimedia technology (Sound & audio, image & graphics and animation & special effects, storage and access speed).

Text Books:

1. Computer Graphics; D. Hearn & P.M. Baker, Prentice Hall of India, 1995.
2. Advanced animation and Rendering Techniques; Alan Watt, Mark Watt, Addison Wesley 1992.
3. Computer Graphics – A Programming Approach; S. Harington-McGraw Hill International Edition.
4. Computer Graphics & Multimedia, G.S.Baluja, Dhanpat Rai & Co.
5. Multimedia Systems Design, P.K.Andleigh and K. Thakrar, Prentice Hall PTR, 1996.

Reference Books:

1. Mathematical Elements for Computer Graphics; Rogers & Adams, McGraw Hill Int. Edition.
2. Fundamentals of Interactive Computer Graphics; Foley, Van Dam, Friner, Hughes, Addison-Wesley, (2nd Edition) 1990.
3. Procedural elements for Computer Graphics; D.F. Rogers, McGraw Hill International Edition, 1985.

BCA 405 –B Linear Programming

Full Marks-50

Time: - 2 hrs 30 min

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 1 mark each ($10*1=10$ marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group –C: - This group consist of 4 questions, out of which 2 are to be answered, each carrying 10 marks ($2*10=20$)

Linear Programming: Structure of linear programming model, advantages and limitations of linear programming, application areas of linear programming,

Mathematical Model of Linear Programming Problem: Examples on production, marketing, finance, agriculture and transportation

Graphical Solution Methods of Linear Programming problem: Examples on minimization and maximization linear programming problem, examples on mixed constraints linear programming

Simplex Method: Standard form of linear programming, simplex algorithm (maximization case), simplex algorithms (minimization case): Two phase method, big-M method.

Duality in Linear Programming: Formulation of dual linear programming problem, advantages of duality, dual simplex algorithm

Transportation Problem: Methods for finding initial solution: North-West corner method, least cost method, Vogel's approximation method, modi method

Assignment Problem: Hungarian method for solving Assignment problem, travelling salesman problem.

Text Books:

THEORY

BCA 501 Internet & Web Technology

Full Marks-50

Time: - 2 hrs 30 min

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 1 mark each ($10*1=10$ marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group –C: - This group consist of 4 questions, out of which 2 are to be answered, each carrying 10 marks ($2*10=20$)

Evolution of Internet: Introduction to internetworking, internet architecture, cookies, Session Tracking, Client server, Browser, Server, ISP.

Internet applications: FTP, Telnet, SMTP, Email, POP3,

World Wide Web: HTTP Protocol.

Designing Web pages (static and dynamic): Html, Html Forms, image maps, DHTML, CSS, Java Scripts, XML, JavaScript

Text and Reference Books:

1. Inline/Online Fundamentals of the Internet and the World Wide Web, GreenlawHepp, Tata McGraw Hill Publication
2. Multimedia and Web Technology, RameshBangia, Firewall Media Publication
3. Internet and Intranet Engineering, Minoli, Tata McGraw Hill Publication.

BCA 502 Advanced Database Management Systems

Full Marks-70

Time: - 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each ($10*2=20$ marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group –C:- This group consist of 4 questions , out of which 2 are to be answered, each carrying 15 marks ($2*15=30$)

Transaction and schedules: Concurrent Execution of transaction, Conflict and View Serializability, Testing for Serializability, Concepts in Recoverable and Cascadeless schedules.
Lock based protocols, time stamp based protocols, Multiple Granularity and Multiversion Techniques,

Distributed Transactions Management: Data Distribution, Fragmentation and Replication Techniques, Distributed Commit, Distributed Locking schemes, Long duration transactions,

Issues of Recovery and atomicity in Distributed Databases: Traditional recovery techniques, Log based recovery, Recovery with Concurrent Transactions, Recovery in Message passing systems, Checkpoints, Algorithms for recovery line, Concepts in Orphan and Inconsistent Messages.

Distributed Query Processing: Multiway Joins, Semi joins

BCA 503 Fundamentals of Computer Algorithms

Full Marks-70

Time:- 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each ($10*2=20$ marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group –C:- This group consist of 4 questions , out of which 2 are to be answered, each carrying 15 marks ($2*15=30$)

Introduction: Algorithms, Analysis of Algorithms, Design of Algorithms, Complexity of Algorithms, Asymptotic Notations, Growth of function, Recurrences and their solution methods.

Sorting in polynomial Time: Insertion sort, Merge sort, Heap sort, and Quick sort, Radix Sort

Advanced Design and Analysis Techniques: Brute Force, Divide and conquer, Dynamic programming, Greedy Algorithm, Backtracking, Amortized Analysis, 8-queens problem, Branch and Bound

Graph Algorithms: Elementary Graph Algorithms, Breadth First Search, Depth First Search, Minimum Spanning Tree, Kruskal’s Algorithms, Prim’s Algorithms, Single Source Shortest Path, All pair Shortest Path,

Elective 3

BCA 504-A Mobile computing

Full Marks-70

Time: - 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each ($10*2=20$ marks) from the entire syllabus uniformly.

Group -B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group -C:- This group consist of 4 questions , out of which 2 are to be answered, each carrying 15 marks ($2*15=30$)

Introduction to Mobile Communications and Computing: Mobile Computing (MC) : Introduction to MC, novel applications, limitations, and architecture. GSM: Mobile services, System architecture, Radio interface, Protocols, Localization and calling, Handover, Security, and New data services.

Wireless Medium Access Control: Motivation for a specialized MAC (Hidden and exposed terminals, Near and far terminals), SDMA, FDMA, TDMA, CDMA.

Mobile Network Layer: Mobile IP (Goals, assumptions, entities and terminology, IP packet delivery, agent advertisement and discovery, registration, tunneling and encapsulation, optimizations), Dynamic Host Configuration Protocol (DHCP).

Mobile Transport Layer : Traditional TCP, Indirect TCP, Snooping TCP, Mobile TCP, Fast retransmit/fast recovery, Transmission /time-out freezing, Selective retransmission, Transaction oriented TCP.

Database Issues: Hoarding techniques, caching invalidation mechanisms, client server computing with adaptation, power-aware and context-aware computing, transactional models, query processing, recovery, and quality of service issues.

BCA 504-B Networks and Information Security

Full Marks-70

Time:- 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each ($10*2=20$ marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group –C: - This group consist of 4 questions, out of which 2 are to be answered, each carrying 15 marks ($2*15=30$)

Introduction to Information Security :Need of Information Security, Attributes of Information Security, Authentication, Confidentiality, Integrity, Availability, Non Repudiation, Access Control, Threats and Vulnerabilities, Security Attacks, Unauthorized Access, Impersonation, Denial of Service, Malicious Software, Viruses, Worms, Trojan Horses, Identification and Authentication, Password Authentication, Password Vulnerabilities and attacks, Password Policy, Biometrics Authentication.

Cryptography :Cryptography Basics: Plain Text, Cipher Text, Encryption Algorithm, Decryption Algorithm, Cryptanalysis, Symmetric and Asymmetric Encryption, Substitution Cipher, Transposition Cipher, One time Pad, Block and Stream Ciphers, Data Encryption Standard (DES), Message Authentication and Hash Function, Public Key Cryptography principles and application, RSA, Public Key Encryption Algorithm

Network Security : Network Devices: Switches, Routers, Firewalls, VPN Concentrators, Load Balancers, Proxies, Network Intrusion Detection System (NIDS), Network Intrusion Prevention System (NIPS).

Text Books:

1. William Stallings "Cryptography and network security, principles and practices", Pearson
2. Gollmann, Dieter, "Computer Security", John Wiley & Sons Ltd.

Reference Books:

1. Debby Russell, T. Gangemi, Sr., "Computer Security", O'Reilly publications.
2. Simson Garfied, "Web security, Privacy Commerce,", O'Reilly Publications.
3. Behrouz A. Forouzan, "Cryptography and Network Security", Tata McGraw-Hill Edition

BCA-505 Programming in Visual Basic

Full Marks-50

Time: - 2 hrs 30 min

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 1 mark each (10*1=10 marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks (4*5=20)

Group –C: - This group consist of 4 questions, out of which 2 are to be answered, each carrying 10 marks (2*10=20)

Controls : Introduction to controls textboxes, frames, check boxes, option buttons, images, setting borders and styles, the shape control, the line control, working with multiple controls and their properties, designing the user interface, keyboard access, tab controls, default & cancel property, coding for controls.

Operations: Data types, constants, named & intrinsic, declaring variables, scope of variables, val function, arithmetic operations, formatting data.

Decision Making : If statement, comparing strings, compound conditions (and, or, not), nested if statements, case structure, using if statements with option buttons & check boxes, displaying message in message box, testing whether input is valid or not.

Modular programming: Menus, sub-procedures and sub-functions defining / creating and modifying a menu, using common dialog box, creating a new sub- procedure, passing variables to procedures, passing argument by value or by reference, writing a function/ procedure.

Forms Handling : Multiple forms creating, adding, removing forms in project, hide, show method, load, unload statement, me keyword, referring to objects on a different Forms

Iteration Handling: Do/loops, for/next loops, using msgbox function, using string Function

Arrays and Grouped Data Control: Arrays - 1-dimension arrays, initializing an array using for each, user-defined data types, accessing information with user-defined data types, using list boxes with array, two dimensional arrays. lists, loops and printing list boxes & combo boxes, filling the list using property window / add item method, clear method, list box properties, removing an item from a list, list box/ combo box operations.

Database Connectivity: Database connectivity of forms with back end tool like mysql, populating the data in text boxes, list boxes etc. searching of data in database using forms. Updating/ editing of data based on a criterion.

506 Internet And Web Technology Lab (HTML, DHTML, XML, JAVASCRIPT)

507 Programming In Visual Basic

SEMESTER VI

THEORY

BCA 601 Theory of Computation

Full Marks-70

Time:- 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each ($10*2=20$ marks) from the entire syllabus uniformly.

Group -B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group -C:- This group consist of 4 questions , out of which 2 are to be answered, each carrying 15 marks ($2*15=30$)

Introduction to automata: Alphabet, String, Language, Grammar, Concepts of automata theory, some applications.

Finite automata: An informal picture of finite automata, Deterministic and non-deterministic finite automata, Language recognized by finite automata, Equivalence of deterministic and non-deterministic finite automata, Finite automata with epsilon-transitions.

Regular expression and languages: Regular expressions, Language associated with regular expressions, Connection between regular expression and regular languages, Finite automata and regular expressions, Regular grammars, Equivalence between regular languages and regular grammars, Chomsky classification of languages, Proving languages not to be regular, Pumping lemma and its applications, Properties of regular languages

Context free grammars and languages: Context free grammars, Context free languages and derivation trees, Ambiguity in grammars and languages, Properties of context free languages, Normal forms of context free grammars, Pumping lemma for context free languages.

Pushdown automata : Basic definition, Language recognized by pushdown automaton, Pushdown automata and context free languages, Context free grammars for pushdown automata, Deterministic pushdown automata.

Turing machines: Definition, Turing machine model, Representation of Turing machines, Design of Turing machines

Elective 4

BCA 602 –A Distributed Computing

Full Marks-70

Time:- 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each ($10*2=20$ marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group –C: - This group consist of 4 questions, out of which 2 are to be answered, each carrying 15 marks ($2*15=30$)

Trends towards Parallel Processing: Type of Parallel Processing, Difference between Temporal and Data Parallelism.

Parallel Processing Mechanism: Multiplicity of functional units, Parallelism and pipelining within CPU, Overlapped CPU & I/O operation, Use of hierarchical memory; system, balancing of subsystem bandwidths, Multiprogramming and Time sharing.

Pipelining: An overlapped parallelism, Instruction and Arithmetic pipelines, Principles of Designing Pipeline Processors, Vector Processing requirements, Architecture of Vector Computers.

Array Processor: SIMD Array; Processor, SIMD Interconnection Networks, Parallel Algorithms for Array Processors.

Multiprocessor: Functional Structures, Loosely coupled Multiprocessor, Tightly coupled Multiprocessor, Interconnection Networks, Time shared of Common Buses, Crossbar switch & Multiport Memories, Multistage Networks for Multiprocessor.

.Text Books :

1. Computer Architecture & Parallel Processing – By K. W. & Briggs.

Reference Books:

1. Quinn M. J. “Parallel Processing: Theory and Practice,” McGraw-Hill , (1994).
2. Hwang, K., “Advanced Computer Architecture : Parallelism, Scalability & Programmability”, McGraw Hill Inc. (1993).

BCA 602 –B Client-Server Computing

Full Marks-70

Time:- 3 hours

Question paper will have three groups.

Group -A (Compulsory):- This group consist of 10 multiple choice questions of 2 marks each ($10*2=20$ marks) from the entire syllabus uniformly.

Group –B: - This group consist of 6 questions, out of which 4 are to be answered, each carrying 5 marks ($4*5=20$)

Group –C: - This group consist of 4 questions, out of which 2 are to be answered, each carrying 15 marks ($2*15=30$)

Introduction to client/server computing - Advantages of client/server computing, Connectivity, Performance improvement, Reducing network Traffic, Vendor independence, Faster delivery of systems.

Components of Client/Server Applications – The Client: Role of the client, client services, Request for Service, Remote procedure call, Fax/Print services, Window services, Remote Boot Services, Remote services, Utility Services, Message services, Network services, Application services, Database services, Dynamic Data Exchange (DDE), Object Linking and Embedding (OLE), Common Object Request Broker Architecture (CORBA).

Components of Client/Server Applications – The Server: Server functionality, Request processing, file services, Fax/Print/Image services, Database services, Communication services, Security services, Network Operating System, platforms, Server operating system, Distributed Computing Environment (DCE), System Application Architecture (SAA).

Components of Client/Server Applications – The Connectivity: Open systems interconnect, Communications interface technology, Interprocess communication, Wide area network technologies, Network Management.

Client/Server Systems Development – Service and Support: Administration, Availability, Reliability, Serviceability, Software distribution, performance, network management, Remote systems management, Security, LAN and network management issues. **Client/Server Systems Development – Training:** Training advantages of GUI applications, Systems administrator training. Future of Client/Server Computing.

Text Book: 1. Patrick Smith, Steve Guengerich, Client/Server computing, 2nd Edition, Prentice Hall, reprint 2012.

Reference Books:

1. Robert Orfali, Dan Harkey, Jeri Edwards, The Essential client/server survival Guide, 2nd Edition, Galgotia Publications, 2009.
2. Larry T Vaughn, Client/Server System Design and implementation, International Edition, McGraw-Hill, 2008.
